**2020**

The CCC would like to thank the CCC Foundation for its ongoing efforts to support Corpsmembers and CCC alumni.

**CCC  
FOUNDATION**

The CCC Foundation has developed programs that allow corporations, foundations, local businesses and individual donors to generate critical financial support for Corpsmembers.

The CCC Foundation enhances the education, training and leadership skills of the Corpsmembers, and invests in programs that preserve, protect and enhance California's natural resources with donated funds.

The California Conservation Corps (CCC) is proud to honor these graduates. As Corpsmembers, they spent long days working on demanding projects; supporting, among other things, energy conservation, fire suppression, and emergency response efforts (including the ongoing COVID-19 pandemic), as well as critical watershed, fisheries, and forest health improvements throughout the state. In their free time, they have volunteered at numerous community events. Through it all, they have continually devoted time to their classes, studying hard to achieve their goal of completing high school.

Many of the graduates will take advantage of their CCC Brad Duncan Scholarships and AmeriCorps Education Awards to continue their education after the Corps.

Today, we salute these graduates, their friends, and their families.

We also thank the teachers and staff of the John Muir Charter School, Urban Corps Charter School, and the CCC who have selflessly and tirelessly supported Corpsmembers on their journey.

Special thanks to the California Conservation Corps Foundation, John Muir Charter School, and the Urban Corps of San Diego Charter School for sponsoring this event.
